

Arpita Patil

Python Developer | AI/ML & Cloud Enthusiast

+91-6361239720 | arpitapatil7676@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Python Developer with a strong foundation in **Python Programming, Generative AI, and AI-assisted technologies**. Experienced in building scalable Python applications and responsive user interfaces using HTML, CSS, JavaScript, and React. Demonstrated impact through AI-driven and automation projects, achieving up to **85% reduction in research time**, **30% improvement in product rating reliability**, and **25% reduction in application errors**. Skilled in Prompt Engineering, AI model interaction, AI response evaluation, and developing reliable AI-powered applications, with working knowledge of **AWS cloud fundamentals** to support end-to-end, cloud-aware AI/ML solutions.

SKILLS

Technical Skills (Core / High Priority): Artificial Intelligence & Machine Learning (AI/ML), Generative AI, Prompt Engineering, AI Model Interaction & Response Evaluation, Python

Cloud & Infrastructure: AWS (Amazon Web Services), Version Control (Git, GitHub), Basic Cloud Deployment Concepts

Front-End Technologies: HTML, CSS, JavaScript, React

Core Competencies (Soft Skills): Analytical Thinking & Problem Solving, Attention to Detail, Communication & Cross-Functional Collaboration

EXPERIENCE

Software Developer Intern

Aug 2025 – Apr 2026

Visvesvaraya Research & Innovation Foundation | Python, HTML, CSS, JavaScript, React, MySQL

- Reviewed and maintained application data, ensuring data integrity, consistency, and accuracy across web-based systems.
- Performed quality assurance (QA) testing, **reducing application errors by 25%** while improving system reliability.
- Managed frontend-backend data integration, collaborated with cross-functional teams, and supported process improvements through data verification and technical documentation.

PROJECTS

Sentiment-Based E-Commerce Product Rating System

Aug 2025 – Feb 2026

Python, React, MySQL | [GitHub](#)

- Developed an AI-driven sentiment analysis system for 100+ customer reviews, **improving sentiment detection accuracy by 25%**.
- Improved product rating reliability by 30%** by classifying feedback across 50+ products.
- Automated the review verification process, reducing manual effort by 40% and doubling review processing speed.

Multi-Agent AI Research System

Apr 2026 – Jun 2026

Python | [GitHub](#)

- Developed a multi-agent AI system to automate web search, content extraction, and report generation, **reducing research time by 85%**.
- Collected and analyzed data from 5+ online sources, enabling automated report generation and LLM-based response evaluation.
- Built an end-to-end research pipeline, eliminating manual intervention and **increasing research throughput by 6x**.

CERTIFICATIONS

- Generative AI Certification** – Simplilearn (2025): Learned the fundamentals of Generative AI, Large Language Models (LLMs), and Prompt Engineering, with an understanding of building AI-powered applications.
- Prompt Engineering for ChatGPT** – Coursera (2025): Gained hands-on experience in prompt design, AI response evaluation, and optimizing LLM outputs for accuracy and relevance.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

2022 – 2026

Visvesvaraya Technological University (VTU), Belagavi | CGPA: 8.2/10
